

SMARTIE

Synergistic Management and Advancement of Artificial
Intelligence in European Higher Education

WP2. Alliance for Artificial Intelligence in Higher Education – Setup SMARTIE

T2.2. Analysis related to adoption AI in educational process

D.2.2.1. E-questionnaire for higher education

A. Background Information

1. *Which country is your institution located in?*
2. *What is your institution's profile?*
 - ☐ University
 - ☐ University of Applied Sciences
 - ☐ Medical school
 - ☐ Technical university
 - ☐ Research institute
 - ☐ Technical College/Polytechnic
 - ☐ University + Research Institute
3. *How many students are enrolled at your institution (approx.)?*
 - ☐ More than 10,000
 - ☐ 5,001-10,000
 - ☐ 1,000-5,000
 - ☐ Fewer than 1,000
4. *Please indicate your role at your institution*
 - ☐ Associate professor
 - ☐ Full Professor
 - ☐ Assistant professor
 - ☐ Lecturer
 - ☐ Junior teaching/research assistant, PhD student
 - ☐ Senior lecturer
 - ☐ Resident
 - ☐ Administration Staff
 - ☐ Senior teaching/research fellow, Postdoctoral Researcher
5. *How many years have you worked in higher education?*
 - ☐ 11-20 years
 - ☐ More than 20 years
 - ☐ 1-5 years
 - ☐ 6-10 years
 - ☐ Less than 1 year
6. *Please indicate your academic field*
 - ☐ Engineering, manufacturing and construction, architecture
 - ☐ Medical sciences, health-related sciences
 - ☐ Business and administration, economics
 - ☐ Teacher training and education science
 - ☐ Personal services, transport services, security services

- Social and behavioral sciences
- Physical sciences, mathematics
- Computer sciences
- Life sciences
- Environmental Sciences
- Law

7. *How old are you?*

- Above 65 years old
- 56 - 65 years old
- 46 - 55 years old
- 36 - 45 years old
- 26- 35 years old

8. *What is your gender?*

- Male
- Female

B. AI in higher education

9. *How does institutional communication affect your perception of AI in teaching?*

- It positively influences my perception by providing clarity and support
- It has no significant effect on my perception
- It increases my trust in using AI tools for teaching
- I have not encountered any institutional communication on this topic
- It causes confusion or uncertainty about how to use AI
- It makes me more skeptical or cautious about using AI in teaching

10. *How can AI improve student engagement and learning outcomes?*

- By automating administrative tasks so educators can focus more on teaching
- Through adaptive learning platforms that adjust to individual student needs
- By providing personalized learning pathways
- Through real-time feedback and assessment
- By gamifying content to make learning more engaging
- By offering 24/7 access to AI-driven learning support
- By using chatbots or virtual tutors to support student learning
- Through data analytics to identify at-risk students early
- Through immersive technologies such as AI-powered VR/AR experiences

11. *How can AI support faculty in managing learning diversity in the classroom?*

- By personalizing learning materials based on student needs and readiness

- By offering accessible content (e.g. text-to-speech, translations, visual aids)
 - By saving time on routine tasks allowing more focus on individual support
 - By translating content into simpler language or multiple formats
 - By providing real-time feedback and progress tracking for individual students
 - By adapting assessments to different learning styles or abilities
 - By helping identify struggling students early through predictive analytics
 - I don't believe AI is effective for managing learning diversity
12. *Are you aware of any successful applications of AI in higher education? Have you experienced any positive impacts of AI in higher education?*
- Yes, I am aware and have experienced positive impacts
 - Yes, I am aware, but I have not experienced any positive impacts
 - No, I am not aware, but I am open to learning more
 - No, I am not aware and have not seen any positive impacts
 - I have heard of AI applications, but I am unsure about their impact or success
13. *In what ways do you think AI can influence the development of 21st-century skills, such as critical thinking and problem-solving?*
- By providing adaptive challenges that stimulate problem-solving
 - By encouraging students to analyze and evaluate AI-generated content
 - By offering instant feedback to help students reflect and improve
 - By enabling simulations or real-world scenarios for skill application
 - By supporting collaborative learning through AI-driven platforms
 - By freeing up teacher's time to focus on facilitating higher-order thinking
 - I don't believe AI supports the 21st-century skill development in students
14. *What do you see as the potential benefits of using AI-driven predictive analytics in higher education?*
- Personalized learning paths based on individual progress
 - Improved academic advising and decision-making
 - More efficient allocation of institutional resources
 - Enhanced student retention and success rates
 - Early identification of at-risk students for timely intervention
 - Don't know
15. *Do you believe AI has the potential to assist with grading and provide fair and accurate assessments?*
- Somewhat - but only when combined with human oversight
 - Not sure - I need more evidence or experience to decide
 - Yes - AI can enhance fairness and consistency in grading
 - No - it could introduce new biases or inaccuracies

16. *How can the use of artificial intelligence to create teaching resources support faculty's continuing education and improve their educational practice?*

- ☐ By saving time on content creation wing focus on pedagogy and reflection
- ☐ By suggesting innovative teaching strategies and methods
- ☐ By helping teachers adapt materials to different student needs or levels
- ☐ By offering inspiration or templates to develop their own resources
- ☐ By enabling personalized professional learning (e.g. resource recommendations)
- ☐ By providing up-to-date content aligned with curriculum standards
- ☐ I'm not sure how AI can support continuing education
- ☐ I don't believe AI contributes to faculty development
- ☐ By creating Open Educational Resources

17. *At what stages of the teaching process do you most frequently use AI tools?*

- ☐ Course preparation
- ☐ None
- ☐ Assessment and evaluation
- ☐ Student support
- ☐ Lesson delivery

18. *To what extent do you feel prepared to guide students in the responsible and ethical use of AI tools?*

- ☐ Slightly prepared
- ☐ Moderately prepared
- ☐ Not at all prepared
- ☐ Very prepared

19. *What specific AI tools or platforms have you used in your teaching?*

- ☐ ChatGPT
- ☐ Turnitin
- ☐ Canva
- ☐ DALL E
- ☐ Gemini
- ☐ Copilot
- ☐ Deepseek
- ☐ Research Rabbit
- ☐ Perplexity
- ☐ Others
- ☐ No AI tools

20. *How reliable do you find AI tools in detecting plagiarism or academic misconduct?*

- ☐ Somewhat reliable
- ☐ Neutral
- ☐ Not very reliable

- Very reliable
- Not at all reliable

21. *What AI tools do you use (or have you used) for plagiarism detection?*

- Turnitin
- Grammarly
- AI checker, AI detector
- Quillbot
- Ephorus
- ZEROGPT
- DocoLoc
- Plagiarism Checker
- Paperpal
- NoPlagio
- Compilatio
- Paraphrasing tool
- Ithentikate
- None

22. *What role should international cooperation play in shaping AI policies for higher education?*

- Essential – global standards and cooperation are required
- Important, but national policies should take precedence
- Somewhat unimportant – AI regulation should be institution-specific
- Not important – each country should develop its own AI policies
- Other (please specify)

C. Strategies related to AI

23. *What strategies do you think are most effective in raising students' awareness of the ethical risks associated with the use of AI?*

- Develop clear institutional policies and ethical guidelines for AI use
- Provide training and ongoing support for faculty and staff
- Encourage pilot projects and innovation in AI-assisted teaching
- Invest in infrastructure and secure accessible AI platforms
- Involve students and faculty in co-designing AI policies
- Align AI integration with institutional goals and pedagogical values
- Foster partnerships with AI developers and industry experts
- Foster partnerships with other Universities

24. *What strategies can higher education educators use to balance the use of AI and human judgement in developing educational resources?*

- Using AI to generate initial drafts, then refining with personal expertise

- Combining AI-generated content with student feedback and classroom insights
- Setting clear pedagogical goals before using AI tools
- Ensuring cultural and contextual relevance through teacher input
- Collaborating with colleagues to review and humanize AI-generated content

25. *What challenges do you have in guiding students on the responsible and ethical use of AI?*

- Lack sufficient knowledge about AI tools
- Institutional policies on AI use are unclear or nonexistent
- Unsure how to evaluate the credibility and biases of AI-generated content
- I don't feel confident addressing ethical implications of AI in education
- Limited access to training or resources
- None/no use

26. *What are the main challenges higher education educators face when using AI tools in their teaching?*

- Lack of training
- Concerns about data privacy and ethics
- Lack of clear institutional policies
- Lack of clear institutional guidelines
- Cost of AI tools
- Resistance to change
- Lack of technical support
- Technical difficulties
- There are too many AI tools
- I don't know
- Lack of availability of different AI Tools

27. *Do you think higher education educators are under pressure to use AI tools in teaching?*

- Yes
- No

28. *Would you be interested in participating in a specific training on the use of AI in teaching?*

- Yes
- No

29. *What formats of training would best help higher education educators learn to use AI tools?*

- In-person workshops
- Webinars
- Online self-paced courses
- Peer-learning

30. *What factors would most influence your decision to start or continue using AI in teaching?*
- Evidence of improved student learning outcomes
 - Access to user-friendly AI tools
 - Clear institutional guidelines or policies
 - Time efficiency or workload reduction
 - Availability of training and technical support
 - Alignment with the nature and pedagogical approaches of my academic field
 - Peer usage or recommendations
 - Student feedback or expectations
 - Incentives or recognition for innovation in teaching
31. *What strategies can help overcome cultural and change-resistance barriers to AI adoption in universities?*
- Providing training and support to build AI literacy among staff
 - Showcasing successful use cases and pilot projects
 - Involving educators and staff in the AI adoption process from the start
 - Encouraging open dialogue about concerns and ethical implications
 - Aligning AI tools with institutional values and academic freedom
 - Offering incentives or recognition for early adopters
32. *How can AI support students with special needs or learning difficulties?*
- By providing assistive technologies (e.g. text-to-speech)
 - By offering personalized learning plans tailored to individual needs
 - By translating content into simpler language or multiple formats
 - By enabling more accessible assessments
 - By helping identify learning challenges early through data analysis
 - No idea
33. *How can universities balance the implementation of AI with preserving academic autonomy?*
- Allowing educators flexibility in choosing whether and how to use AI
 - Involving faculty in decision-making on AI policies and tools
 - Ensuring transparency and explainability of AI systems
 - Setting clear boundaries for AI use in assessment and content creation
 - Aligning AI adoption with academic freedom and pedagogical values
 - Regularly reviewing AI tools for ethical and academic impact
 - No idea
34. *What strategies should universities adopt to effectively integrate AI into their educational system?*
- Develop clear institutional policies and ethical guidelines for AI use

- Provide training and ongoing support for faculty and staff
- Encourage pilot projects and innovation in AI-assisted teaching
- Invest in infrastructure and secure accessible AI platforms
- Involve students and faculty in co-designing AI policies
- Align AI integration with institutional goals and pedagogical values
- Foster partnerships with AI developers and industry experts
- Foster partnerships with other Universities
